## **Trinity Adds Bariatric Stretcher to Further Support Healthcare Facilities**

Trinity E.M.S. recently added bariatric stretcher to their fleet of services the currently offer to Healthcare Facilities. The study of bariatrics pertains to the causes, prevention and treatment of obesity. In keeping with the bariatric trend in the U.S., Trinity E.M.S has purchased the new equipment to accommodate the greater weight and size of patients, with the goal of reducing the risk of injury to both patients and providers.

Some of the features include:

- \* Stretcher can accommodate a patient up to 1,000 lbs.
- \* 700 lb. Lifting Capacity, without lift assistance.
- \* Five-Position Drop Frame for ease of movement in confined spaces.
- \* Stretcher is 37" at it's widest point.

Trinity professionals are trained to become an extension of your staff, responding quickly and professionally to your needs and the needs of each patient. Our experienced personnel, cutting edge technology and passion for service mean you can feel confident in the safety and security of your patients and residents.

*Flexible Bariatric Solution*

*Integrated Charging System*
